

Declaration of Conformity

The undersigning Dott. Paolo Salemi,
in quality of Procurator of the Company:
EAST WEST s.a.s., head office in Via Roccavoli, 10
Terrasini (PA) – Italy
VAT code: 04287340824

Declares:

That the product: SUPER TECH®
(Optimizer of Combustion)

Year of Production: 2022
Lot of Production: A00001>22

Has been produced in respect of the following normatives:
Directive 2014/30/UE - known as:
“Electromagnetic compatibility Directive”

And is, therefore, conform to the existing normative.

Data 01.01.2023

The analyse of risks, the manual and the
documentation which is part of the technical file has
been verified by Eng. Renato Carraro.

C & C s.a.s. Via Lauro. 95 Cadoneche Padova Italy

Description:

SUPER TECH® is a solid, immersion device which works inside the fuel tank of all vehicles having hydrocarbon traction (fuel and diesel). Its function is to weaken the inter-molecular bonds of hydrocarbons in order to obtain an improved combustion inside the engine and a sensible reduction of polluting gas emission, besides a sensible reduction of fuel consumption.

Installation:

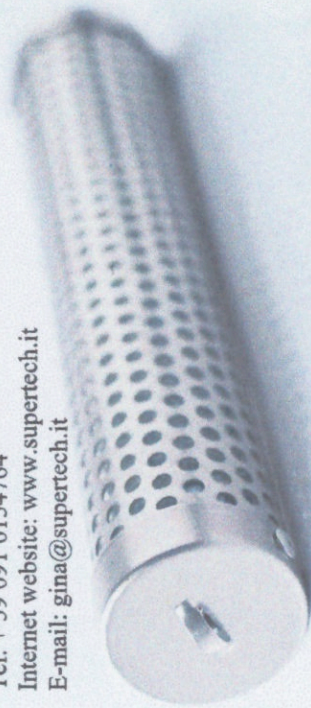

- Unscrew the access cap of the fuel tank.
- Carefully remove the fuel aspiration pump.
- Hook the device to the aspiration pump, through the stainless steel cable and assure it touches the bottom of the fuel tank.
- Re-position the aspiration pump, closing the access. Close the session.

Supplementary Notes:

- Use the device only on vehicles and not on steady machineries (such as gasoil boilers etc)
- Use only on what forecasted.
- Keep out of children's reach
- The range of action of the electromagnetic field is very limited (maximum 10cm) as noticed by using a (EMF detector) detector of electromagnetic field, therefore it can, in no way, determine any sort of dangerous to people or things, nor may it compromise the safe operation of the vehicle, since it is installed inside the fuel tank and doesn't have electric, mechanic, hydraulic connections with the parts of the engine.
